Reasons for comment:

Comments:	I strongly Object to this offensive and obstructive development proposal which is both dangerous and will blight the entire village. Pear Tree Lane is a narrow country lane with poor visibility and few passing places. Accidents frequently occur already. There is very little space for parking on Pear Tree Lane, residents and customers of the See Ho pub already park along the stretch of road near the site entrance and pedestrians have to walk along the road. Paragraph 89 of the National Planning Policy Framework (the "Framework") states that any developments must be 'sensitive to its surroundings and do not have an unacceptable impact on local roads'. Touring caravans regularly coming in and out of the site will be dangerous for other road users given how narrow the road is and the poor visibility for oncoming traffic. Approving this development would certainly increase the risk of accidents, therefore having an unacceptable impact on safety on the local roads. The proposal is contrary to the principle set out in paragraph 89 of the Framework. The nature of the proposals are out of keeping with previous developments on Pear Tree Lane and the surrounding area. As noted above, paragraph 89 of the Framework states proposals must be "sensitive to its surroundings" and paragraph 135(b) of the Framework notes that planning should be "sympathetic to local character and history, including the surrounding built environment and landscape setting". Further, local planning policy CS19 states that any developments should "conserve and enhance the character of the local built, historic and natural area" and "integrate well with the surrounding local area". As confirmed in the previous decision to planning application 20200339, a distinctive characteristic of Pear Tree Lane is the openness of the area and the spaciousness of the properties thereon. In stark contrast to those established characteristics, this new planning proposal shows five structures (2 static homes, 2 touring homes and a day room) on the site, which would be crammed into a small plot. These proposals would therefore clearly diminish the characteristic spaciousness of surrounding properties on the road and such a density of structures should
-----------	--

not be approved. There are no similar, established patterns of development in the surrounding area meaning that this proposed development would not integrate well with the rest of the Lane.

This development would clearly be an inappropriate development that is harmful to the Green Belt. None of the exceptions set out in paragraph 154 of the Framework would apply to this development, meaning that by definition the development is harmful. The reasons put forward in the decision on planning application 20200339 are all equally as applicable to this application, in particular paragraph 35 which confirms that in circumstances where Framework exceptions do not apply, development on this plot would be harmful to the Green Belt

Kind regards
