Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments: Objections

I object to this application as the use of Permitted Development legislation in an Area of Outstanding Natural Beauty and Green Belt is totally inappropriate. The very large scale of the proposed building at such a prominent location would have a negative and harmful impact on the open rural character, compromising the views and natural beauty of the landscape. Due to industrial nature of such a site the noise and light pollution would have a huge detrimental impact on the surrounding area, footpaths and wildlife. The proposed track to carry heavy goods vehicles from Gold Street to the building crosses Footpath NS190 and therefore poses a risk to public safety. The roads leading to and from the site, being a rural location with narrow lanes and few passing areas, are not suitable for the large commercial vehicles that would be used during its operation and construction posing a hazard to other road users including pedestrians, cyclists and horse riders. The A227, which would potentially be a main access route to the location, is already extremely congested and is likely to become more so due to the current expansion of Meopham School and future development in respect of the Local Plan which will inevitably result in more housing in and around the area. The siting and appearance would be inappropriate and harmful to the landscape. As such, it is considered that the proposed development would be harmful to the openness and natural character of the surrounding Kent Downs Area of Outstanding Natural Beauty, the Green Belt and Istead Arable Landscape Character Area and contrary to Policies CS02 and CS12 of the Gravesham Local Plan Core Strategy (2014) and Paragraph 174 of the National Planning Policy Framework (2023).

Only the necessary scrutiny that comes from a full planning application would provide the ability to properly assess whether these impacts could be overcome.

Kind regards
