Description of Proposed Works

Please describe the proposed works

This application proposes a dropped kerb outside of the named property (Green Hedges, DA13 0HW).

Parking in the vicinity is scarce and largely consumed by commuters who bypass the permit system to park on the adjacent streets intended for use by residents. The homeowner wishes to alleviate this issue by removing a vehicle from the road via the introduction of off-street parking.

With electric vehicles becoming the norm, the homeowner wishes to take positive steps for the environment by replacing a petrol vehicle with a fully electric vehicle and would like to create a charging point on the proposed driveway at the property.

Security is a concern for those residents who have no option but to park on nearby roads, with vehicle theft having been experienced by the homeowner since taking ownership of the property. Driveway security features are intended to prevent this issue in the future.

It is proposed that the existing, raised patio to the front of the property is excavated to create a gently ramped, permeable driveway, to allow for comfortable off-street parking for at least one vehicle.

This would require the removal of the existing boundary walls and hedges to the front of the property, which would be replaced with lower block walls and fencing, to provide clear viewing angles from the driveway entrance. Notably, this would also improve viewing angles for both adjacent properties, which have existing driveways and dropped kerbs.
