Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	<p>Grounds of objection:</p> <ol style="list-style-type: none">1. The site is designated as Green Belt in the current Local Plan. There are no exceptional circumstances justifying building on this site.2. Given the multiplicity of applications for significant development in the immediate area, none of these should be granted permission until the Local Plan has been updated and the potential for any development in the area has been considered on a comprehensive area-wide basis.3. The existing infrastructure of the village is insufficient to support large scale development of this type. Medical facilities, schools and similar services can barely cope with the demands of the current population.4. The local roads cannot support any large scale development in the area. The A227 is at capacity as it is, with significant queues and delays occurring during rush hours.5. There are Primary and Special schools located close to the site. The development would adversely affect both. Traffic emerging from or entering the site would compromise the safety of the children attending the schools.6. This site is an important part of the countryside locally and its loss would cause significant damage to the environment and its ecology as well as causing the loss of productive agricultural land.

Kind regards
