Natural England 30 May Additional Comments

Priority habitats and Species

Priority habitats and Species are of particular importance for nature conservation and are

included in the England Biodiversity List published under section 41 of the Natural Environment

and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of

Special Scientific Interest, on the Magic website or as Local Wildlife Sites. A list of priority

habitats and species can be found on Gov.uk.

Natural England does not routinely hold species data, such data should be collected when

impacts on priority habitats or species are considered likely. Consideration should also be given

to the potential environmental value of brownfield sites, often found in urban areas and former

industrial land, further information including links to the open mosaic habitats inventory can be

found here.

If this could be considered as well I would appreciate it.

If you require any additional comments please do not hesitate to contact me.
