

Biodiversity Enhancement Plan
1:200

The insect hotel will be mounted approximately 1–1.5 m above ground level, fixed securely to a post or fence, and positioned in a south- or south-east-facing orientation to receive morning sunlight. The plan provides an indicative location.

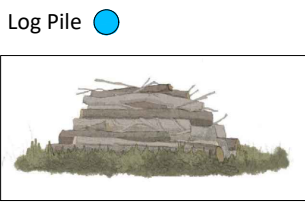

Bat boxes should be installed in dark locations away from sources of light, at a height of at least 4m. Bat boxes to be installed in accordance with the Bat Conservation Trust 'Bat Box Information Pack'. The plan provides an indicative location.

Two bird boxes will be installed on suitable mature trees within the site, positioned at least 2–4 metres above ground level and facing north or east to avoid strong sunlight and prevailing winds. The plan provides an indicative location.

To be located in a shady, quiet area by the North-East boundary. The plan provides an indicative location. "Hedgehog highways" to be provided at ground level, at the base of fences (13 cm x 13 cm).

A log pile will be located by the west boundary. It will measure 3m in length, 2m in width and 0.5m in height. The plan provides an indicative location.
