Reasons for comment:

Comments:	I would like to offer my support to the newly proposed planning application at Furzy Lea number 20250225. The applicant has clearly gone to extreme lengths to correct any 'extreme engineering works' which the council and other members of the public have opposed, by planting huge amounts of trees, shrubs and greenery which far exceeded the original garden layout. The applicant is also going to reposition the steps, take down columns, reduce the height of the wall and undertake numerous changes to address the 'openness' of the land, all at considerable cost to himself. Once the trees, shrubs etc have grown the garden will be much nicer than the original layout which was just grass. The gym had already been agreed by the council and to facilitate this structure, obvious changes to the layout of the land had to be made and this had to include various retaining walls, the structure of these, I think, look very professional, modern and once the greenery has grown will be covered over anyway. When the council gave permission of the gym they should have made clear that any change to the layout of the land would need full planning permission, but they did not, so the landscaping of the garden had to take place to enable the gym to be built..The applicant has clearly worked extremely hard on the landscaping and is now doing everything he can do to correct all aspects that have received negative comments. Please work with the applicant so that all parties can benefit from this planning application, it is obvious from negative comments made that people are going out of their way to stop this planning application, which given time will look outstanding.
