Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I am writing to formally object to the proposed development on the grounds of privacy and lighting concerns. I understand that the development aims to increase teaching and drama facilities, but I have significant concerns regarding how this will impact my privacy, the quality of natural light at my property and light pollution from emergency lighting on the proposed building. Privacy Concerns: The design and proposed layout of the development would result in a direct line of sight into my private spaces, including my living room, kitchen and garden. This poses a serious intrusion into my privacy and will negatively affect the enjoyment of my home. I respectfully request that alternative designs or mitigations be considered to preserve privacy for surrounding properties, such as the introduction of screening or landscaping to block views. Lighting Concerns: Additionally, the height and positioning of the new structure may result in excessive shading and loss of natural light to my property. This will not only affect my quality of life but may also reduce the aesthetic and functional use of my home and outdoor areas. I also have concerns of emergency lighting at the rear of this building which causes light pollution in my garden and living spaces. I ask that a detailed light assessment be carried out to understand the potential impact and to ensure that the development does not unduly affect surrounding properties. I strongly believe that these issues must be carefully considered and addressed before approval is granted. I would appreciate it if you could take my concerns into account as part of the planning process and explore options to mitigate the negative impacts on my privacy and lighting.
