Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I am writing to express my strong disagreement with the application for a dwelling on the green belt area near our community. There are several reasons why I believe this proposal should be rejected. Firstly, the proposed location falls within the designated green belt, which is essential for preserving the natural environment and preventing urban sprawl. Building on this precious green space would not only harm the local ecosystem but also go against the principles of sustainable development. Secondly, I have observed that the individuals behind this application have already cut down a significant number of trees in the area and are currently using it as a storage space for old cars leaking oil. This irresponsible behaviour has already had a negative impact on the environment and should not be rewarded with further construction. Additionally, the burning of toxic rubbish on the site has been a major concern, as it releases harmful smoke into the neighbourhood twice a week. Despite reports being made to the council, no action has been taken to address this issue, putting the health of residents at risk Lastly, the proposed entrance to the dwelling is in direct violation of regulations, as it has destroyed a pedestrian path that previously provided safe access for the community. This disregard for existing infrastructure and public amenities is unacceptable and should not be condoned. In light of these reasons, I urge you to consider the environmental impact, the disregard for existing regulations, and the negative consequences this dwelling would have on our community before approving this application. I appreciate your attention to this matter and trust that you will make the right decision for the well-being of our neighbourhood.
