Reasons for comment:

Comments:	Please do not destroy our Greenbelt and countryside. If nothing else the Coronavirus Pandemic emphasised how important countryside , nature and open spaces are for our physical and mental health. We should be saving our environment not destroying it. The proposed site is the home to Skylarks , a bird that due to its recent and dramatic population decline makes it a conservation status Red.Surely we should be protecting this bird for future generations, it is so important we do not continue to destroy their habitat and lose them and the beautiful sound of them singing overhead forever. The field is the habitat of so many other birds and wildlife , I could name so many. It also has a public footpath that is used for exercise and dog walking by many people without having to drive to get there Meopham.Sole Street and Cobham would all become one urbanisation.Greenbelt was to stop all villages merging and losing individuality. How would Meopham cope with such over development. The local facilities are already struggling, there is no mention of providing a Doctors Surgery or a
-----------	--

Dentist for all their new homes.

Southern Water are already saying they are struggling to meet customers demands. With all that is happening in the world why are you destroying agricultural land it should be saved so we can be more self sufficient as a country. Aren't we supposed to be reducing food miles?

Norwood Lane and all the surrounding roads could not cope with all the extra traffic . Most homes now have one car if not more.

You already have to queue to get out of Norwood Lane to the A227 Wrotham Road and where you join the A2 to London during the morning rush hour all 4 lanes are always gridlocked. Think of the air, noise and light pollution , even electric car chargers give off light pollution!

There are empty buildings all round Gravesend where the infrastructure for electricity and plumbing would already be in place.

The builders say they will plant trees and wildflower meadows there are already existing trees and beautiful hedgerows Why destroy established trees they are needed to reduce flooding. 10 million have been planted but by 2030 20 million will be needed don't destroy existing ones.

I appreciate new homes have to be provided but not at the risk to already endangered species . There must be alternative locations that do not threaten them.

The UK has some of the worst records for protecting wildlife ,let Gravesend be a leader in changing that and save and protect it now and for the future.

Kind regards
