Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I am objecting to the proposed planning permission due to the significant impact it would have on community access, local traffic, and infrastructure. The existing car park, adjacent field, and skate park are well-used by residents and visitors alike. During events on the promenade, the car park is often at full capacity, supporting footfall to local businesses and allowing the community to enjoy the vibrant events held in the area. Removing this facility would severely limit access, particularly for those attending community events, visiting the nearby temple and mosque, or supporting local businesses. As a regular member of Athena Fitness, I know many attendees rely on the availability of nearby parking and would struggle to continue attending classes without it. Additionally, the surrounding roads, particularly Albion Road, already suffer during periods of disruption or roadworks. In such cases, Albion becomes a heavily used diversion, causing congestion and disruption to residential streets, which are not equipped to handle such volumes of traffic. The condition of Albion Road is already poor and would require significant, ongoing maintenance to cope with increased use. Furthermore, Ordnance Road and Canal Road experience heavy congestion during peak hours. Adding further pressure from additional traffic would only exacerbate the existing problems, impacting the quality of life for local residents and making travel in and out of the area more difficult.
