Regarding the plan of a Laurette at no 4 cross lane east, Gravesend is not acceptable & not appropriate as it would create alot more traffic & being it's a main route for the fire brigade come up the road very fast and being a neighbour that lives across from the premises it's more advisable to be a chemist as there was one many years ago - plus it would help the community in the road to pick up there prescriptions as the nearest are abit a far if you do not drive & it would not create so much traffic

Regards
