

20260207 Farmland Norwood lane/Camer road Meopham Kent

To whom it may concern

The greenbelt is what it says greenbelt . It is not for housing and ruination of beautiful countryside home to lots of animals and wild habitat .

I am aware the Labour government does not care about the above and just want to build anywhere and everywhere to fulfil a pledge when trying to win the general election . Trying to win votes with young people but, young people don't want the ecosystem killed off which this will do .

There are plenty of brown sites available go build there !

The fields should be used for what they are there for to grow food, so as the UK are not dependent on foreign foods .

The wrotham road and surrounding roads are far to busy now , a bypass suggested nearly 40 years ago is still needed .

We do not need another school , we do not need more people , we do not need more traffic and increase to try and park at local shops .

Darent valley hospital does not have the capacity for more patients as they only have about 900 beds .

These things are never thought through its just all about money ! by greedy builders . This is a village and should remain so ,with the country side left in place as nature intended and it will work naturally to prevent flooding . The fields flood and then drain as nature intended . Stop looking at greenbelt look at brownbelt and leave the people that live here alone with our beautiful village and fields .

One more thing the old police station by meopham green was knocked down and houses built for local people instead they moved people in from gravesend this has impacted on footpaths and verges as the people who live there even though they have 2 parking spaces park on the verge and churn up the grass .

The increase in vehicles and parking on pavements has impacted on local people and the aesthetics of that end of the village .

I doubt this e-mail or the many others you receive will bother you.....all about the money not quality of life .
