- Wave Style Roof Panels
- UV Protected Polycarbonate
- Heavy Metal Duty Frame
- Pre-Cut Panels For Easy Assembly
- (H) 273.4cm x (W) 494.7cm x (D) 300.2cm

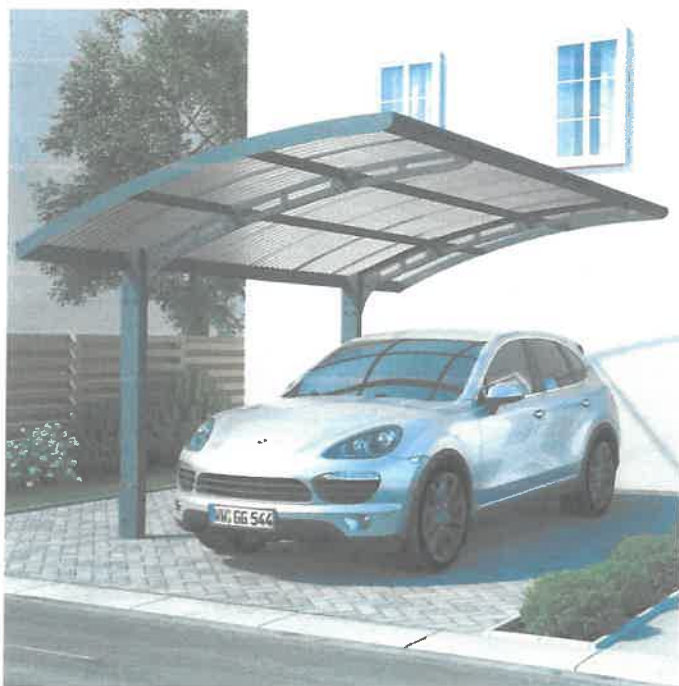

With it's virtually unbreakable construction, the Arizona 5000 Wave Cantilever Carport by Palram-Canopia can provide an attractive shelter for your car or motorbike. For easy access when opening your car doors, the freestanding carport features two legs and a heavy duty frame that is rust-resistant and powder coated. The open design also allows wider cars to benefit from this shelter.

Designed to withstand severe weather conditions, the Arizona is also 100% UV protected to ensure that they do not discolour or fracture over time, whilst offering complete UV blockage.

To allow for easy assembly, the panels are supplied pre-cut and full instructions are included.

	Height (cm)	Width (cm)	Depth (cm)
Dimensions	273.4	494.7	300.2

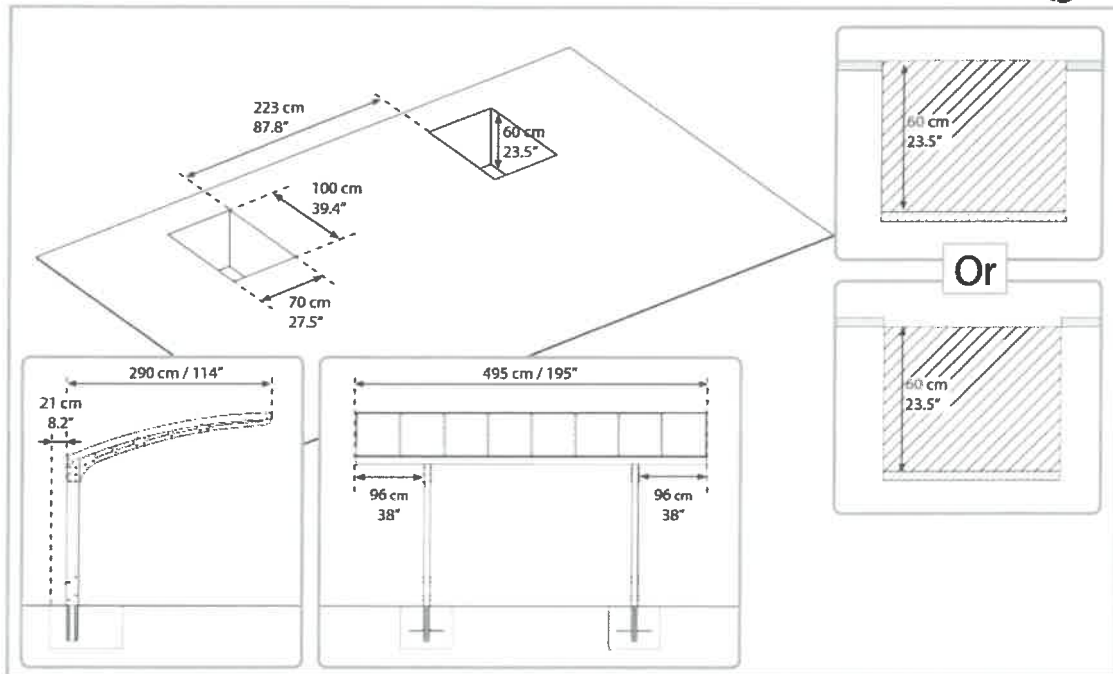

Product Code: 703727

Palram-Canopia Arizona 5000 Wave Cantilever Carport

6

Concrete footings are required for installation

This drawing does not enlarge very well, so have included the original size for clarity. The version I propose to erect will have the 'legs' on the right hand side, rather than the left side.
