

20250721

Dear Sirs/Madam,

With reference to planning application 20250721,

This whole scheme will have a devastating effect on the area in general , and Lower Higham in particular.

1/ The removal of contaminated material by road.

This goes against all current environmental rules and practices. You have a perfectly good railway that the waste could safely transported away on.

2/ Should you decide to use lorries ,the traffic generated would be catastrophically dangerous.

Your plan to make the a one way system between Lower Higham and the Cliffe Road would, in effect, cut off our community. Please bear in mind that the Higham Surgery is about to close permanently and everyone will have to travel to Cliffe/Cliffe Woods in order to see the Doctor. A Traffic management scheme would impinge on our ability to do this journey.

As far as I can see you have not taken into account the veiws of local residents and the whole scheme is ill thought- out and environmentally dangerous.

Please reject this scheme? planning application
