Reasons for comment:	
Comments:	<p>Letter of Objection - Planning Application 20250992</p> <p>Dear Sir/Madam,</p> <p>I am writing to register my strong objection to Planning Application 20250992, proposing</p> <p>the construction of 350 new houses.</p> <p>1. Inadequate and unsafe access arrangements</p> <p>The proposed access onto the A227 presents a significant safety concern. The A227 is</p> <p>already a heavily trafficked route, frequently congested during peak hours and used as a</p> <p>main thoroughfare for both local and through-traffic. Introducing substantial additional</p> <p>vehicle movements from a development of this size would greatly increase the risk of</p> <p>accidents and further slow traffic flow.</p> <p>Additionally, access via Green Lane is wholly unsuitable. Green Lane is a narrow road,</p> <p>not designed to accommodate high traffic volumes, construction vehicles, or the long-term</p> <p>increase in cars associated with 350 new homes. Increased use will likely lead to congestion, bottlenecks, and heightened risks for pedestrians, cyclists, and existing</p> <p>residents.</p>

It is also important to note the proposal sits directly opposite The Parade, which is already a busy shopping area with parked cars, frequent turning, and high pedestrian activity. Adding a major residential access point in this location is inappropriate and raises serious safety and urban-planning concerns.

2. Impact on essential local services

The local GP surgery is already under strain, with long waiting times and limited capacity. An influx of residents from 350 new homes would place additional pressure on an already overstretched service, potentially reducing access to healthcare for current residents.

Similarly, local schools are operating near or at capacity, and the development would almost certainly create demand for school places far beyond what the area can currently provide. Without guaranteed, funded expansion of educational infrastructure, this development is not sustainable.

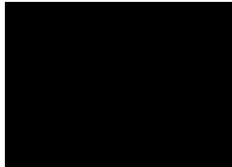

3. Overall sustainability concerns

This proposal does not demonstrate that it can be safely or sustainably integrated into the

existing community. The cumulative impacts on highways, health services, education, and

local amenities have not been adequately mitigated or justified.

For these reasons, I respectfully request that Planning Application 20250992 be refused.

Kind regards
