Email:	[REDACTED]
Address:	Foxendown Lane Meopham

## Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I object to this application due to its unacceptable impact on highways, drainage, wildlife, pollution, and local services, especially when combined with the nearby 350-home proposal.  1. Unacceptable Cumulative Traffic Impact This site is near the 350-home proposal. Combined, the developments could generate well over 1,500-2,000 vehicle movements per day. My lane often is gridlocked at peak times and this and all the narrow village lanes cannot sustain such traffic. This raises: pedestrian safety concerns emergency access constraints increased air pollution near homes and shops

### 2. Drainage and Flooding Concerns

As with the larger proposal, the area is known for flood-prone lanes some of which, including mine, do not have mains drainage. Removing permeable greenfield land will significantly worsen flooding for existing residents. No adequate Sustainable Drainage Solution (SuDS) has been demonstrated.

### 3. Loss of Wildlife Habitat and greenbelt land,

The area supports a wide variety of wildlife, including badgers, which are

protected under the Protection of Badgers Act 1992. Cumulative habitat fragmentation will occur if both developments proceed. The ecological reports do not demonstrate how continuity of habitat will be preserved.

#### 4. Lack of Local Infrastructure Capacity

Already at breaking point, Local GPs, schools, buses and the Darent Valley Hospital are struggling. No meaningful infrastructure expansion is included with the proposal.

#### Conclusion

This development represents unsustainable cumulative overdevelopment that would overwhelm infrastructure, harm wildlife, increase flooding risk, and severely compromise road safety. It should be refused.
