Reasons for comment:

Comments:	<p>The infrastructure, particularly with regards to the roads in and around this area, cannot support any further significant development such as in this application. Already in the event of a problem on the A227 road the whole area becomes grid locked as the local village side roads are totally inadequate to support the traffic. The additional volume of traffic which will come from the Lower Thames Crossing will also add to the present load on the A227 and should be considered with such a large development. The A227 is already a "rat run" caused by problems on the M20, M25, A228 and A229.</p> <p>The infrastructure cannot support a further large development with regard to medical centres, schools, roads and public transport.</p>
