Fibre to the Premises (FTTP) Statement

This statement has been prepared in support of the discharge of Planning Condition 23 relating to the provision of Fibre to the Premises (FTTP) infrastructure.

The development has been designed to accommodate a high-speed, full Fibre to the Premises (FTTP) broadband connection serving all residential units within the approved development. In addition, a landlord connection has been provided within Core 2 of the development to facilitate the operation of the CCTV system.

Appropriate ducting, chambers, and associated telecommunications infrastructure has been installed throughout the site to enable connection to the local FTTP network.

The developer has engaged with the recognised telecommunications provider, Openreach, to facilitate the delivery of FTTP services to the development. The on-site infrastructure has been installed in accordance with the requirements of the selected network provider and will be made available for connection prior to the first occupation of each dwelling.

The FTTP infrastructure has been laid out and constructed in accordance with the approved details and will be available for use upon first occupation of the residential units hereby approved.

Accordingly, the development will comply with the requirements of Planning Condition 23.

Kind regards,

Sabina Grabauskaite
Design Coordinator
