Pollinator Patch at 4 Constitution Terrace

The selection of plants listed should thrive in this NW facing border.

Many will provide pollen and nectar for pollinating insects especially bees and butterflies throughout the year.

They are also low maintenance and visually attractive. Spring bulbs such as crocus and dwarf Narcissus could be planted beneath shrubs.

Note in red as denoted on plan.

Trees and Shrubs

Rowan - *Sorbus acuparia* white flowers in late spring, red berries in autumn. Deciduous Rowan
