

20230239 Grange Travel Limited Canal Road

KCC Heritage 18 July 2023

My apologies for the delayed response.

The site of the proposed building lies over the line of the infilled section of the Thames Medway Canal. The location of the building would be partially over the infilled canal and partly over the southern towpath.

Would it be possible to find out what foundations would be used for the proposed structure as this information would help guide recommendations for any mitigation that might be necessary?
