

20230678 Land South Of Two Gates Hill Town Road

KCC Heritage 18 July 2023

The site of the proposed development lies within an area of high archaeological potential.

Cultivation of the land may have had an impact on any below-ground archaeological remains at the site, but in order to provide advice about the potential archaeological impacts and what mitigation might be necessary, I would need to know what ground works are proposed for the location of the caravans, access, parking and services.

Would it be possible to ask the applicant's agent what groundworks are proposed?
