

I strongly object to the above planning application which is north of the Drove Way. This area is Greenbelt land and not designated for development. The impact on local amenities and wildlife will be tremendous. Istead Rise Primary School and Downsway Medical Practice are already at full capacity. Local hospitals are too already struggling.

The two access points to the proposed development are small and flanked by private homes which will experience noise pollution for a sustained period of time. The Drove Way itself is not fit for construction traffic. It has become busier over recent years with residents having more than one car, many have families with 3 or 4, allowing only single car passing, again, not suitable for heavy construction traffic. The roads in and out of Istead Rise and Wrotham Road are already very busy, another 100 family homes and added construction traffic would cause major congestion to already extremely busy junctions.

Another note-I had already tried to submit my objections online, but the 30 minute time allowance is insufficient time to complete so are now having to send by email. Is this strategy put in place to turn people off commenting? The portal allows for comments up to 5000 characters, you would need to be a speed typist to manage this in 30 minutes!!!
