

## Comments summary

Dear Sir/Madam,

Planning Application comments have been made. A summary of the comments is provided below.

Comments were submitted at 19/12/2025 3:12 PM from 

### Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: The increase in traffic will cause major problems. The surrounding roads were never designed to support large vehicles. Increased traffic means more pollution, more wear and tear on the roads and the potential for large vehicles to not follow guidance and use the village as a cut through.  
With the plans for the lower Thames crossing going ahead traffic will no doubt increase and this development will add even more.  
We also have major concerns regarding the removal of the asbestos. .

Kind regards
