Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments: I strongly object to this development. I am not against development, I am against development on our green belt.
There are a numerous number of brownfield sites that should be built on first in Gravesend.
Our village is being overdeveloped. The developers do not care about where they build. It is all about how much profit they make.
There is no space for children at the local school. Children cannot get a place at their local school. Parents have to drive to drop their children off at nearby schools just adds to the traffic problems in the morning on a daily school run.
The increase in traffic on The Drove Way will increase by over 60-70%. This is unacceptable. The Drove Way is not built for this amount of traffic. At the moment there are numerous cars that park on the road causing a hazard. CO2 noise congestion will increase.
The doctors surgery is at full capacity. Getting an appointment now for existing residents is a nightmare.
There is no capacity for additional buildings, we do not want our village to be swallowed up by numerous housing developments. 100 here, 8 there, and so on. It seems that applications are being made to every bit of green land. I am talking about the proposal a few years back for houses to be built on green land on The Drove Way, which I am pleased to say was rejected.
Public transport is a joke. There is not enough of it. Therefore every household has two plus cars.

What is to happen to all the wildlife.with all the building going on where do they go?

Kind regards
