Dear Sir/Madam,

Planning Application comments have been made. A summary of the comments is provided below.

Comments were submitted at 17/12/2025 11:40 AM from [REDACTED]

Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: I object to this as it will have a massive negative impact on myself and my family. My son goes to school in Higham and I work in Gravesend so the time it takes me to take my son to school and go to work would triple. It would impact on shopping deliveries and family visits also if an ambulance needed to come it would take alot longer. Alot of people use the road to take children to and from school so I wouldn't make any sense to make the road one way. Also the health impact due to the lorry's containing asbestos would be detrimental to people living in the village and surrounding areas. People move to these areas to get away from pollution! It would also not make sense as there's lots of farm land around the area and tractors have to come up and down the roads. I do not want lorry's coming past my house constantly due to the noise pollution and they would be carrying materials harmful to our health!

Kind regards
