Reasons for comment:

Comments:	<p>Based on my experience in public service, I am concerned that the projected increase of around one thousand additional cars, including delivery and service vehicles, would further degrade local air quality, with likely health implications for residents. It would also add to noise and night time light pollution and accelerate deterioration of the road surface, necessitating more frequent maintenance and, in turn, additional congestion and associated emissions.</p> <p>Traffic pressures are already significant, with an estimated 700 vehicles accessing the A227 near the Green Lane junction and the busy shopping area. The location sits adjacent to a conservation area, and increased vehicle movements risk undermining its visual character and setting.</p> <p>The shopping parade is already recognised as an accident black spot. At school drop off and pick up times, Wrotham Road is heavily lined with parked cars alongside Meopham Community Academy and Mini Meopham's Nursery; introducing further traffic into these conditions would heighten risks for children and other pedestrians.</p> <p>Looking ahead, the Lower Thames Crossing is expected to increase traffic on the A227, which is already used as a cut through by large HGVs. Taken together, these factors point to a substantial rise in traffic volumes and pollution across the village, with adverse consequences for public health and amenity.</p>
-----------	--

Kind regards
