

I am writing in respect of the above Planning Application and list below my reasons why this should not be approved.

1. Increase of volume of traffic in general the A2 has in the last few years become extremely busy and has resulted in an increase of accidents, this can not be coincidence.
2. Increase of school age children- only one school on Istead Rise - other schools in Gravesend but with all the building of houses and flats on Gravesend side of the A2 these schools are already have increased uptake.
3. Pressure on Doctor's and Darenth Hospital with increase of patients.
4. Green areas taken away to be replaced by houses and flats and then photo opportunities with Gravesham dignitaries planting a few tree's, I have always thought Gravesham Council was concerned with climate change.
5. Housing need in 2017 by Gravesham council lead to 8 homes built this has now been increased to another 250 so what happens in the next ten years when more homes are "needed" in this area.
6. Many people moved here for the village/ countryside aspect of living and since building has increased in surrounding areas crime has gone up, again as with point No.1 this can be no coincidence.

Overall I think this area has already contributed to need of housing with the existing new builds, please leave our lovely village and countryside alone.
