

Half Round System Components

Rainwater guttering systems consist of a series of components that fit together to suit the required layout. Below is a schematic showing the component options of the galvanised and colour coated gutter system.

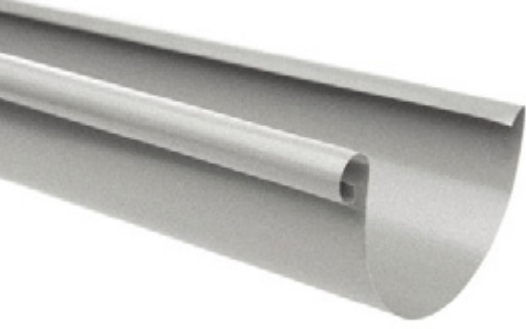

Galvanised & PPC Half Round Gutters

Unmatched durability and high performing Infinity Steel half round gutter system is available in a innovative coating system taht is extremely hard wearing. The coating consists of three layers comprising zinc corrosion protection, primer bonding coat and a ‘Robust’ UV and scratch resistant polyester top coat.

3m Length

- Galvanised coated steel for permanent corrosion prevention
- Colour coated options for additional protection and aesthetics
- High UV resistance (RUV-4)
- Inclusive of bead connector and union clips
- Roll formed from 0.6mm galvanised steel
- 3m length as standard

	Product Code		Galvanised	Anthracite Grey	Dusty Grey	Sepia Brown	Grey White	Jet Black	Aluminium Grey	Traffic White

	190mm	HRS75/3MA*	●	/GRY				/BLK		/WTE

Fascia Bracket

- Manufactured to match the half round profile exactly for secure connection to both gutter and structure
- Generally position at 915mm centres, 3no. per 3m length
- Manufactured from 1.25mm galvanised steel
- Maximum stability due to deep stamping of the reinforcing seam

Union Clip

- Inclusive of rubber seal
- Snap fix system via Z spring to ensure secure and robust connection between gutter lengths and fittings
- Demountable and reusable
- Allowance for expansion within the system
- Manufactured to fit the half round system with exact precision

Finishes - *to specify a plain galvanised finish order the code as shown in the first column, to specify a premium colour or finish add the correct suffix to the end of the product code, for example HRS40/3MA/GRY for a 115mm gutter 3m length in Anthracite Grey finish.
