Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I object to the proposals for the following main reasons: Past applications clearly lead to this application exploiting a loop hole and that the other buildings on the site would then be 'converted' after this setting a precedence! Where does this all end?! Even more traffic down the narrow country lane causing even more disruption to the local conservation area! Extra traffic in the local area would be a negative impact! This would disrupt the local peace of the conservation area. Conversion works and then the eventual residence will disturb the local wildlife in this important green belt area. Owls have been spotted locally (and filmed) along with the presence of bats & newts etc. Also, this creates additional noise and light pollution, some of which directly affects neighboring properties. The area as it stands needs protecting, not expanding!
