Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	<p>OBJECTION TO PLANNING APPLICATION</p> <p>I object to the proposed development on the following grounds:</p> <ol style="list-style-type: none">1. Increased traffic Adding more vehicle movements in this area would significantly increase congestion and create unacceptable highway and pedestrian safety risks.2. Insufficient Local Infrastructure Existing services cannot accommodate additional demand. Local roads are already under pressure, and there is inadequate public transport provision. Schools, GP surgeries, and other essential community services are at or near capacity, making the development unsustainable. The surrounding lanes are often impacted by closures to Wrotham Rd. As a small road with no viable 'go around' every time there is an accident, blockage or roadworks on the Wrotham Rd the surrounding lanes become completely gridlocked. Since I have lived in the area for 7 years this has been a frequent happening. Construction traffic, road works and then eventually new residents traffic in this area will add to the misery in surrounding lanes.3. Harm to Local Character and Residential Amenity The scale, density, and design of the proposed houses are out of keeping with the surrounding area. The development would also introduce additional noise, air, and light pollution, both during construction and once occupied, adversely affecting the quality of life for current residents. For these reasons, I urge the planning authority to refuse the application
