Planting and materials

Shingle and Hardstanding

We will use MOT type 1 for the hardcore and permeable shingle for the shingled driveway. The size of the shingle is 10-20mm in size

We will purchase this from the online retailer - Discount Builders Merchants. This shingle matches several neighboring properties along Norah Lane.

Existing Plants/Hedges/Trees

Our property has a variety of hedges and bushes that will remain along the border. These are mature bushes and hedges that are giving us a great deal of privacy from the neighboring property. I do not know the species of these bushes/hedges as they were planted by the previous owner.

Maintenance

Regular maintenance of the hedges will be carried out, including cutting them back to ensure they remain healthy and well-kept.
