RE: 89 Coopers Road Northfleet Kent DA11 7AH 20260563

I strongly object for the following reasons:

Increase of bins on a very narrow path that is on the junction of Perry St
Parking of cars in this area is already oversubscribed as there is no back access for cars or motor cycles due to the entry being narrow having a massive impact on St Margarets, St Peters and Beatrice Gardens. The large refuse trucks can no longer get up these road due to cars parked up there which are already half on the very narrow path and residents from Beatrice gardens often walk in the road. Gravesham has already tried to resolve the parking in this area so has already been highlighted as a problem area.

the Path outside also includes an area of uneven rocky surface splitting it in two with a post box insitu and would become an issue if blocked by bins, motor cycles etc. Coopers road is also access to the Vets and church.

There is a lot of anti social behaviour in Perry street including drinking, grafitti, litter youths fighting.

The property is very small even with the extensions and would be very difficult for the fire service due to the side entrance being very narrow.

The footfall in this area for two large seniors schools, Cecil Road School, vets, Doctors surgery and glass shop and cannot afford to have there accesses blocked.
