

DESIGN AND ACCESS STATEMENT
PROPOSED DRIVEWAY AND CROSS OVER

Introduction

This Design and Access Statement is prepared by CWO DESIGN in support of the application for a Drive way alteration in a conservational area

My client wants to construct a driveway to provide parking for his property, due to a request by the electric charging point company as a drive is required before a charging point can be installed

The front drive is adequate for a car and the materials will be permeable paving with a drain channel installed between the driveway and the drop kerb
