Comments:

I am writing to lodge my objection to this plan based upon a number of issues. These being;

1. Impact to local infrastructure, utilities and resources. The area itself is struggling to support the current residents and will not be able to sustain further houses and residents. The traffic struggles daily and increasing this with the roads we currently have will cripple the area and have a negative impact on accessibility.
2. Local services; this includes GPs, Schools and other resources. Again, the current area does not have capacity for new patients, school placements.
3. Wildlife; the CBRE report confirmed that this country has enough brownfield sites to create new housing for those in need. Please think wiser and smarter and use brownfield sites. Once the greenbelt is gone it's gone forever. We cannot let the wildlife and our future generations down by losing more beautiful countryside because it's easy to build on. Kent is slowly becoming a car park and it's awful. Please keep and help save the small pockets, protect the wildlife and help keep it for generations to come. The only people who benefit are the developers who line their pockets.

The area itself is beautiful - don't ruin it with poorly thought out developments that only add pollution, pressure to already crumbling services and direct impact to poor wildlife. Come on Gravesham plan better - don't allow this to happen.

Kind regards
