Reasons for comment:

Comments:	The proposed use represents a significant enhancement to the borough's social infrastructure. Places of worship provide far-reaching benefits beyond their religious function. In an area such as Gravesham, recognised for its diverse and multicultural population, such facilities are critical to meeting the needs of a wide range of community groups. The proposed use will ensure that this building continues to offer public value in a socially inclusive and sustainable way. The site is situated in a highly accessible urban location, within walking distance of surrounding residential areas and close to public transport links. In addition, there are several public car parks nearby, including Milton Place and Gordon Road, both within short walking distance. In conclusion, this application represents a sustainable, policy-compliant, and socially beneficial change of use. It brings a redundant building back into active use, supports the delivery of vital community infrastructure, and contributes to the overall wellbeing and cohesion of the local area. On planning grounds, there are no reasons to withhold consent, and I therefore respectfully recommend that planning permission be granted without delay.
