## Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	<p>I strongly object to this proposal.</p> <p>The proposal conflicts with the Gravesham Local Plan and NPPF as brownfield sites have not been considered first.</p> <ul style="list-style-type: none"><li>- Highways and Traffic Capacity The area around the proposed access point onto Wrotham Road is regularly gridlocked with stationary traffic during the morning school run period, especially when there are traffic issues on the A2. The nearby junction with Green Lane often has a queue of cars back to Camer Park Road. Adding traffic relating to 350 new homes would make this area impossible to navigate and would also increase pollution levels in the area.</li><li>- Loss of green belt and character The proposed site is green belt land (not grey belt) and is grade 2 agricultural land which is farmed every year. The site is not fully enclosed (as suggested in the proposal) but is open to countryside to the south/south east. Development of the site would result in unacceptable loss of green belt, unacceptable damage to the village character of Meopham and unacceptable negative impact on biodiversity and wildlife eg.badgers,hedgehogs,owls and bats.</li><li>- Pressure on local services Meopham does not have enough amenities to support hundreds of new houses, doctors and schools are already at capacity and as above local roads are already struggling with volume of traffic.</li><li>- Proposed development is not sustainable.</li></ul>
-----------	---

Kind regards
