

Aerial views - proposed mooring options

(based on Google aerial views)

Option 1: Cervia at western end of St Andrews Quay

In this option, LV21 would need to be repositioned approximately 15 metres to the east (towards Bawley Bay and St Andrew's Arts Centre). It is likely that the eastern concrete access platform would need to be extended to align with LV21's shipboard gangway.

Option 2: Cervia at eastern end of St Andrews Quay

In this option, LV21 would need to be repositioned approximately 18 metres to the west (towards the Three Daws and Town Pier)
