Dear Sir/Madam

Planning consultation: Change of use of the land for the stationing of 8 mobile homes for gypsy and traveller use, erection of associated day rooms, soft landscaping and laying of hardstanding (part retrospective).

Location: Land South Of White Post Lane, White Post Lane, Cobham, Gravesend Kent

Thank you for your consultation on the above dated and received by Natural England on 27 August 2025

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

FURTHER INFORMATION REQUIRED TO DETERMINE IMPACTS ON DESIGNATED SITES

The proposed development has the potential to have a harmful effect on terrestrial Sites of Special Scientific Interest (SSSIs) and those Special Areas of Conservation (SACs), Special Protection Areas (SPAs) or Ramsar sites that they underpin.

Natural England's statutory advice on these potential impacts is set out below.

Designated Sites

Further information required - recreational pressure impacts to European Sites (habitats sites)

This development site is within the zone of influence (Zol) for recreational pressure impacts to one or more European Sites (habitats sites).

Within this Zol, proposals for any net increase in residential units will have a likely significant effect on the qualifying features of the European Site(s) (habitats site(s)) through increased recreational pressure when considered either alone or in combination with other plans and projects.

Your authority has measures in place to manage these potential impacts through a strategic solution which Natural England considers will be effective in preventing adverse impacts on the integrity of the site(s).

Notwithstanding this, Natural England advises that these measures should be formally checked and

confirmed by your authority, as the competent authority, via an **appropriate assessment** in view of the Natural England Access to Evidence - Conservation Objectives for European Sites and in accordance with the Conservation of Habitats & Species Regulations 2017 (as amended).

Providing the appropriate assessment concludes that the measures can be secured, it is likely that Natural England will be satisfied that there will be no adverse effect on the integrity of the European Site(s) (habitats site(s)) in relation to recreational disturbance.

Where the proposal includes bespoke mitigation that falls outside of the strategic solution, Natural England should be consulted.

Reserved Matters applications, and in some cases the discharge/removal/variation of conditions, where the permission was granted prior to the introduction of the strategic approach, should also be subject to the requirements of the Conservation of Habitats & Species Regulations 2017 (as amended) and our advice above applies.

Discretionary Advice

Natural England may provide further advice to the applicant through the discretionary advice service (DAS). Refer to [Developers: get environmental advice on your planning proposals - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/developers-get-environmental-advice-on-your-planning-proposals) for more information.

Landscape Advice

The proposed development is for a site within or close to a nationally designated landscape namely **Kent Downs** National Landscape (referred to in legislation as an Area of Outstanding Natural Beauty (AONB)).

Natural England has concluded that impacts on the nationally designated landscape and the delivery of its statutory purpose to conserve and enhance the area's natural beauty can be determined locally by the local planning authority, with advice from its landscape or planning officers, and from the relevant National Landscape Partnership or Conservation Board.

Natural England is not confirming that there would not be a significant adverse effect on landscape or visual resources or on the statutory purpose of the area, only that there are no landscape issues which, based on the information received, necessitate Natural England's involvement.

We advise that the planning authority uses national and local policies, together with local landscape expertise and information to determine the proposal. The policy and statutory framework to guide your decision and the role of local advice are explained below. Your decision should be guided by paragraph 189 and 190 of the National Planning Policy Framework, which requires great weight to be given to conserving and enhancing landscape and scenic beauty within National Landscapes, National Parks, and the Broads and states that the scale and extent of development within all these areas should be limited. Paragraph 190 requires exceptional circumstances to be demonstrated to justify major development within a designated landscape and sets out criteria which should be applied in considering this proposal.

Alongside national policy you should also apply landscape policies set out in your development plan, or appropriate saved policies.

We also advise that you consult the relevant National Landscape Partnership or Conservation Board. Their knowledge of the site and its wider landscape setting, together with the aims and objectives of the area's statutory management plan, will be a valuable contribution to the planning decision. Where available, a local Landscape Character Assessment can also be a helpful guide to the landscape's sensitivity to this type of development and its capacity to accommodate the proposed development.

The statutory purpose of the National Landscape is to conserve and enhance the area's natural beauty. You should assess the application carefully as to whether the proposed development would have a significant impact on or harm that statutory purpose.

Furthermore, [Section 245](#) (Protected Landscapes) of the Levelling Up and Regeneration Act 2023 places a duty on relevant authorities (which includes local authorities) in exercising or performing any functions in relation to, or so as to affect, land in a National Park, the Broads or National Landscape (referred to in legislation as an Area of Outstanding Natural Beauty) in England, to seek to further the statutory purposes of the area. The duty applies to local planning authorities and other decision makers in preparing development plans, making planning decisions on development and infrastructure proposals, as well as to other public bodies and statutory undertakers in undertaking their functions. This duty also applies to proposals outside the designated area but impacting on its natural beauty.

The relevant National Landscape body (Conservation Board or Partnership) may be able to offer advice in relation to the duty, including on how the proposed development aligns with and contributes to delivering the aims and objectives of the area's statutory management plan.

Impact Risk Zones for Sites of Special Scientific Interest

We strongly recommend that local planning authorities (LPAs) use Natural England's Impact Risk Zones for Sites of Special Scientific Interest (SSSI IRZs) (available from the [Natural England Open Data Geoportal \(arcgis.com\)](#) and to use on [MAGIC \(defra.gov.uk\)](#) along with guidance) to decide when to consult Natural England on development proposals that might affect a SSSI.

The SSSI IRZs tool is quick and simple to use and gives instant planning advice as a formal consultation response in certain circumstances. Use of the SSSI IRZs avoids the need for a formal email consultation on some development proposals, reducing unnecessary delays in the planning process. In turn this allows Natural England to concentrate resources on development proposals with the highest risks and opportunities for nature recovery.

[Planning and transport authorities: get environmental advice on planning - GOV.UK \(www.gov.uk\)](#) provides further guidance on when LPAs must consult Natural England on development proposals.

Further general advice on the consideration of protected species and other natural environment issues is provided at Annex A.

We would be happy to comment further should the need arise but if in the meantime you have any queries, please do not hesitate to contact us.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours faithfully

Kimberley McDowell
