

No consideration has been given to residents regarding upheaval, noise and general inconvenience. At the consultation, I asked about our local G.P. surgery taking in a lot more patients on their books. I was told that it wouldn't be a problem - there were lots of spaces. This was not true as our G.P. surgery is full. I asked the same question about the school and was told the same thing - not a problem! The school has a waiting list of 2 years! I also questioned regarding our bus services which are somewhat unreliable and was told residents can walk to the shops and back - wonderful - especially if you are ~~or~~^{not} very mobile and cannot carry shopping or have a pram to push. I was then told to get someone to push you in a wheelchair - what a thoughtful attitude!

A lot of people have put their homes up for sale and a lot are considering doing so. Instead Rise is not the place for this proposed development.

Yours Sincerely
