Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:

I object to this building it obscures our light and view i also hope all properties in the versinaty front and surrounding have been notified as this is in their view too and personally they have had issues acquiring access properties via the rear back alley way that they pay for on their rent at additional cost. The law stands a right to light and view and also find it increasingly concerning as i work in the industry that no building control ,councillors or planning enforcement have attended and this needs to be accessed by a higher department member for inspection and councillors that meet and discuss this should also see from neighbouring properties and their view in person . Its shameful and inconsiderate that no warning was given as to this build and their extra one at the end of the property that has heating,electric window and 2 doors that replaces a lean too that was 4 poles and a tin roof all this is unsightly and over shadows people properties and we cant enjoy sunlight and our gardens the tenants have rights to sunlight and a decent view thats what people look for when locating a property also has the laws been searched for other breaches to the Local environment and location this is not generally excep t able for all neighbours.

Kind regards
