Reasons for comment:

Comments: I am extremely tired of keep being asked to comment on planning permissions that are extremely similar to each other, without amending key features that council didn't agree to. The previous applications were refused due to, as an example, the overly big property that would not fit the landscape. I see that the new planning drawings are only slightly amended with now height of building 8m, which looks the same as neighbouring property at 234 but still much much higher than property 230. If we keep agreeing to buildings that high, we will soon not have any cosy buildings in the neighborhood and all wil be replaced by multi generation monstrosities that interfere with neighbours lives.

I would like to express my strong objection to the proposed planning application, which seeks approval for the demolition of the existing bungalow and the construction of a two-story dwelling with rooms in the roofspace, an outbuilding in the rear garden, a bin store to the front, alterations to the existing frontage for parking, and the creation of a new boundary, including existing access.

My objections are based on the following grounds:

The height of the proposed two-story dwelling with rooms in the roofspace will be of around 8 metres which will completely oversize the neighbouring property at 230. The new construction may significantly reduce the natural light available to adjacent properties, and overlook neighboring grounds, leading to privacy issues and a diminished quality of life for neighbors. Changing the size of the property (officially 5 bedrooms but potential for around 9-10 bedrooms) will also result in significant increase in number of occupants which can increase noise from the

property and therefore, quality of life to surrounding residents. We live in a very quiet area and value our privacy but building of such size, with so many residents, will significantly decrease the life quality of neighbours. Additionally, many windows and balcony so high up will reduce privacy for surrounding properties.

The construction of an outbuilding in the rear garden for use as a gym may result in increased noise and disturbance, which would adversely affect the peaceful and quiet neighborhood and potential loud music from the gym can significantly reduce the quality of life for the neighbours.

Environmental and surrounding neighbourhood aspects - building of such size, together with driveway instead of front garden, and significantly reducing rear garden area will have a negative impact on the environment. There is less and less trees in the neighbourhood and constructing such monstrous buildings only makes matter worse. The residents will also own more cars, previously the residents had 1 car but with property of that size, there will be at least 3-4 cars which increase pollution in the area. Building of this size will also devalue neighbouring properties, because of noise and lack of privacy that is being introduced.

In addition prolonged construction work would cause dust and noise for neighbouring properties. Potential increase in noise, after construction is finished would also have extremely negative impact on people working from home.

In light of these concerns, I kindly request that the planning authority carefully consider the objections raised by me and other concerned residents. I believe that granting planning permission for this project would be detrimental to the quality of life of neighbouring residents.

I urge the planning authority to deny approval for this planning application, or at the very least, to thoroughly review and amend the proposal to address the aforementioned concerns of nearby properties.

Kind regards
