Address:	[REDACTED] Swanscombe, Kent

Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments neither objecting to or supporting the Planning Application
Reasons for comment:	
Comments:	Whilst I can appreciate why the Council may wish to install acoustic panels within the building, I'm not convinced that sufficient detail has been provided by way of the size and design of the panels themselves, the method of attachment and their actual positioning to determine their impact on the significance of the heritage asset. It would also be useful if some form of photomontage could be provided to illustrate them in position and their impact on key views within the building - what for example would the impact be on entering the building and looking northwards towards the former position of the altar and the main window in that direction and would they add visual clutter disrupting such a view? Not objecting to the proposal, rather asking that further information be provided.

Kind regards
