

PLANNERS NOTE: The reasoning for the re-location of the front door is to allow for a wheelchair access ramp to provide a level threshold entry to the property. Off street parking on the site would remain unaffected if the ramp is located to the left of the dwelling as shown on the proposed ground floor plan

NOTE: All dimensions must be checked on site prior to commencement of works. Figured dimensions take precedence over dimensions called off of the drawing. Contractor to ensure that the materials specified are used, if alternatives are proposed, check with designer before proceeding. In any event all workmanship and materials must comply with approved document 7. Any discrepancies between elevations and plans must be checked with designer before commencing work. The designer accepts no responsibility for works undertaken without full plans approval from buildline control.
