2nd November 2021

Dear Sir/Madam

Planning application 2021/1283
Land between Comma Oil and Treatment Works, Dering Way, Gravesend, Kent

We are in receipt of your letter dated 13th October 2021 and respond following your order of matters:

- 1 The application form has been amended and uploaded in accordance with your request, although having local validation requirements that are not in accordance with planning portal protocols is somewhat puzzling.
- 2 The site location plan shows the application site correctly – there is no other land that is in the control of the applicant and so no blue line is present. You will see that the highway (Dering Way) directly abuts the application site. For this reason, the site location plan remains unchanged from that previously submitted.
- 3 Due to the type of structures in question here, being mostly formed of scaffolding products, the production of floor plans and elevations is very difficult. However, plans and elevations of Structures A and C (which are more like buildings) have been produced and uploaded with the amended form.
- 4 We have amended the Block Plan, where Structure A's dimensions are now consistent with the description in our original covering letter, and uploaded the revised version.

We hope that these actions are satisfactory for the Council's purposes and look forward to confirmation of validation.

Yours faithfully

Matt Hartley RIBA
