Reasons for comment:

Comments:	<p>This site is currently vital farm land. Green belt. We should not be building on land that should be used to grow crops.</p> <p>The proposed site will be next to the Helen Allison School. This is a SEN school, the pupils are highly sensitive and this development will cause alarm, stress and sensory overload. The school depends on a calm, low noise environment and this will all negatively impact the wellbeing of vulnerable children.</p> <p>If this proposal goes ahead, it will be taking away land where many animal, bird and insect species live and or feed.</p> <p>Longfield road is a very busy road with a 50 mile per hour limit. The proposed site is also close to the junction with A227 at the Camer shops. This area is frequently very congested - building on this field would make this worse. Heavy slow traffic will cause an increase in pollution which will have a detrimental impact on everyone's health.</p> <p>The A227 is used as a cut through by vehicles, including HGVs, despite narrow road and pavements, and becomes gridlocked when there are incidents on nearby major roads. Local side routes are inadequate to support diversions when required.</p> <p>The Lower Thames Crossing will also increase the traffic in this immediate area. The current bus service is very limited and unreliable and not sufficient for additional local residents.</p> <p>I can see no mention of medical services (GP and dental) for the 500+ residents. It is currently very difficult to access these services in Meopham. How will those services stretch even further?</p> <p>Are the local schools able to cope with possibly 200+ additional students? I didn't see any provision for additional educational services.</p> <p>Can the current amenities cope with additional homes? We currently have frequent power outages. Would the current drainage system be able to cope?</p>
-----------	---

Kind regards
