

20250110

See attached below pictures of the travellers site you are trying to force upon the residents of shorne this is a picture at 5.15am from [REDACTED] and also from the Ridgeway bungalows. The light pollution is beyond a joke and the council has failed the settled community on every point.

Your report states there is no impact on the surrounding residents [REDACTED] affected by this travellers site which is utter nonsense. There are four homes on the boundary of this settlement Amanda Cue you refused the planning application of 2 bungalows and all for this illegal encampment.

The 30 plus flood lights have been left on since 1st January 2025 & not once have they been switched off day or night as the reason is the meter has been bypassed.

This application should be called into planning and dropped you are trying to appease a few travellers at the risk of harm to the settled community who have peacefully been residing here and paying the extortionate council tax forced upon us.

We all follow the planning process but this council has 2 a tier policy one for the law abiding and no policy in place for the non law abiding.

The applicant's father [REDACTED] who is behind this has history of doing the exact same thing in Swanley, Hartley & Darenth setting up travellers sites without permission then renting the site out to other travellers.

If your department tries to force this through other residents and i directly affected by your poor decision will be in contact with CPRE to put a defence in on our behalf.

Every single objection stating the proposed development is:

- a) Out of character with the surroundings properties.
- b) Loss of enjoyment for immediate neighbours.
- c) Traffic increase.
- d) Will cause friction with settled community.
- e) Never been proposed in England a travellers site neighbouring 4 immediate neighbours and opposite 8 bungalows.
- f) Overlooking neighbouring properties.

All the above have been dismissed who is making these decisions? in the council where the surrounding residents thoughts and feelings are brushed off as not of importance!

I urge your department to do the right thing and dismiss this application as not appropriate and no special circumstances are shown, as per the NPPF December 2024 edition where special circumstances have to be shown to allow a travellers site on greenbelt let alone next to neighbouring properties which is being drowned out.

I await your response.

Regards
