whomever it may concern,

It has come to my attention that the newly opened 'Chicken Wingz' has applied to have delivery bikes come and go all evening until 9pm at night.

My first grievance about this is that living just across the road from this and up a few houses that a) I was never informed about this take away opening in first place and b) let alone request to run a delivery service with motor bikes all over the pavement c) there is no reference to this takeaway by name in the request d) or where, eg, Cross Lane East This is all hidden using a Construction Company's name and their address in Singlewell Road! They DO NOT sell takeaways!!!!

Let's start with them DEHA, people turn up to this corner business, park their cars for weeks at a time in Cross Lane East restricting parking spaces. They don't live here, they don't care!

I have lived here for 40 years come next March and I have constantly had to put up with parking issues. Sparks were here for years, got too big but even they had to admit they'd got too big and moved to an appropriate place that accommodated their business. We had a glorious few years of being able to park reasonably.

Then Thames Windows move in, small business then ... they now have over 10 very large van/smaller ones and I assume company cars! The admin staff park in the street, the co workers of the large vans park in the street. Not to mention large vans being left for long periods of time - presumably the worker gone on holiday don't know for sure but do know takes up a vital parking space and that was recently (last 6 weeks). Then there is an articulated lorry that turns up 6.45 in the morning ever Thursday (before offloading time) and they all chatting and talking waking me up before I need to get up.

Then just to make people living in Cross Lane East even more awkward, you put a parking restriction in Devonshire Road so people up that road park their car on Cross Lane East to avoid getting a ticket!!!

So not only I'm I going to be woken up early by Thames Windows I will have to put up with motor bikes/moped disturbing me in what is my HOME not a business.

The traffic already on this road is ridiculous and as for parking you have little hope - I stay at work late because there's no point coming home before 5/5.30 or will have to park up half way up Central Avenue.

I have COPD and I know the level of traffic we have exacerbates this. Maybe getting your colleagues down to test co2 level in my street may make you realise what an already overused road for traffic Cross Lane East is and adding to it is not fair or respectful to people who have to live here.

Kind regards
