Comments:

I am writing to formally object to the proposed planning application on the grounds of its negative impact on the local area and its failure to meet key sustainability and infrastructure requirements. My main points of objection are outlined below.

### 1. Preventing Urban Sprawl

The proposed development would contribute to the unrestricted sprawl of the built-up area. This risks eroding the natural boundaries and green spaces that currently define and protect the character of the community.

### 2. Insufficient Infrastructure and Services

The development would likely lead to a significant increase in traffic congestion on local roads. Current transport links are insufficient, and there is a lack of adequate public transport provision to accommodate additional residents.

### 3. Lack of Social Infrastructure

The local community does not have the necessary capacity within its essential services to support the proposed number of new homes. Schools are already at or near capacity, healthcare facilities such as GP surgeries face long waiting times, and other public services are under strain. Without clear, funded, and timely plans to expand these services, the development would place further pressure on already limited resources.

For these reasons, I strongly object to the proposed planning application and urge the planning authority to refuse permission.

Yours faithfully,

A solid black rectangular box used to redact a handwritten signature.
