Reasons for comment:

Comments:	<ul style="list-style-type: none">- this site has always been farmland. Once built on, we lose the ability to produce food forever.- the proposed access is in an unbelievably dangerous position given the already highly dangerous entry and exit points to Camer Parade.- the additional traffic which the proposed development would cause (c. 700+ vehicles) would create log jams at school drop off and pick up times as well as at any time of day on already congested and narrow roads.- there will be a detrimental visual impact on the adjacent conservation area, once impacted it will be lost forever.- this site and the other proposed developments towards Sole Street will lead to urban creep and destroy the fabric of this community.- we have had several examples in the last few years of traffic bedlam when one small incident leads to a road closure or temporary lights, the additional traffic which this development would cause would increase this problem exponentially. Meopham simply does not have the road infrastructure for more housing. It is a village after all.- camer Parade is a local accident black spot which would only be exacerbated by additional housing.
